Moderna-S HD 2013 electric scooter motorcycle

Electric mobility is no longer the future - it's the standard. This library features the Moderna-S HD, an electric scooter motorcycle that perfectly balances the agile nature of a city scooter with the aggressive torque of a modern electric motor. Whether you are designing a sleek sci-fi vehicle, a modern urban chase, or a clean documentary scene, this library provides the ultimate sonic toolkit. Every nuance, from the unique mechanical "whine" of the belt drive to the tactile feedback of switches and plastic body foley, has been captured with surgical precision.

Ultimate Fidelity: Recorded at 32-bit / 192 kHz for maximum detail and pitch-shifting flexibility.

Comprehensive Coverage: Includes multiple perspectives - onboard, exterior drive-bys (fast, slow, braking) and internal mechanical foley.

Pro-Grade Chain: Captured using industry-standard RØDE NTG1 and Line Audio Omni1 microphones through the Sound Devices MixPre-6 II for a pristine, low-noise floor.

Workflow Ready: Fully UCS (Universal Category System) compliant for instant integration into your sound database.
